JALLI MEGHANA

ABOUT ME

I am an ambitious engineering student eager to embark on my professional journey. My focus is on leveraging my skills, particularly in AI and programming, through hands-on projects like AI chatbots and data visualization. My background in technology, along with my dedication to responsible teamwork and innovation, prepares me for tackling real-world challenges in industry

EDUCATION

2022-Present   **8.23 CGPA**

B.Tech in CSE with AIML
Godavari Institute of Engineering and Technology

2020-2022   **816/1000**

Intermediate Education
Sri Chaitanya Junior College

2019-2020   **599/600**

Secondary School Certificate(SSC)
Ravindra Bharathi School

SKILLS

Technical skills

- Python
- AWS
- Gen AI
- Html
- CSS

Tools Known

- VS Code
- Power BI
- MySQL
- MS Office
- Git
- GitHub

Interpersonal Skills

- Team Management
- Communication
- Problem Solving

LANGUAGES

- English (Conversational proficiency)
- Hindi (understandable)
- Telugu (Native)

TRAINING EXPERIENCE

GEN AI AND AWS TRAINEE
Techwing | Rajamundry   **AUGUST 2024 - JULY 2025**

- Currently undergoing training on Generative AI and AWS cloud services. Learning the fundamentals of generative models, prompt engineering, and AI use cases across industries. Gaining hands-on exposure to AWS tools such as EC2, S3, Lambda, and Sage Maker for deploying and managing AI-driven applications in the cloud. Building skills in cloud infrastructure, serverless computing, and AI model integration.

ARTIFICAL INTELLIGENCE INTERN
AIMERS | Vijayawada   **MAY 2024 - JULY 2024**

- Learned to use Hugging Face models for generating VQA bots and AI comics. Developed object detection models using YOLO and created Telegram bots via ChatGPT and Gemini API integrations. Gained knowledge on cyber attacks and AI driven solutions.

PROJECTS

AI Interview Coach   July 2024

- An AI-powered web application designed to help users prepare for job interviews through real-time question generation, mock interview simulations, and personalized feedback.

Weather AI Chatbot   May 2024

- Weather AI Chatbot Developed a Telegram chatbot that uses AI to communicate with users. Utilized Bot Father to create and manage the chatbot. Integrated a Python script to run the chatbot.

Object Detection   June 2024

- Object Detection Project Performed object detection tasks using neural networks. Applied YOLO algorithm for real-time object detection. Implemented in applications like robotics and video surveillance.

Data Visualization using Power BI   July 2024

- Data Visualization using Power BI Visualized data using Power BI to present actionable insights. Created charts, plots, and infographics for data analysis. Employed Microsoft Power BI for business intelligence tasks.

CERTIFICATES

- Python Essential 1&2 from Cisco Networking Academy
- Python for Data science from IBM
- CCNA certificate from Cisco Networking Academy
